

Family Calendar Connect

What is Family Calendar Connect?

Family Calendar Connect is a new feature of PowerUp Sports, the software behind your club's online registration and club management (Scheduler, Convenor) system. This feature will enable those with registration as well as coaching and/or referee profiles, to consolidate all their games and their family's games into the Family Calendar.

Here's an example based on the Smith Family.

Jane Smith has setup a profile in the registration system in order to register her son Michael to the U16 Boys and her daughter Sally to the U12 Girls house league programs. In addition to this, Jane coaches a U14 Girls team and Michael also referees. Prior to Family Calendar Connect only the playing events for Michael and Sally would be visible. Now the Family Calendar includes Jane's coaching and Michael's refereeing appointments.

How do I use Family Calendar Connect?

Log into the registration system and access your profile by clicking **Profile** from the menu bar.

If the connection is successful, it will be displayed in the Family Calendar Connect area.

Trouble?

The most likely cause of a connection failure is a mistyped login or password. Please verify the information you are using is correct before asking for help. If you have forgotten your referee or coach password you can get a new one using the "What is my password?" feature on the Scheduler/Convenor system's login page.

The Family Calendar

Here's an example of the Smith family calendar once Jane has been connected to her coach profile and Michael has been linked to his referee profile.
